Thanks Jason, I don't want to be a bother, but I want to make sure everything is done correctly.

Larry,
Thanks for the inquiry. The site has a permit with permitted units and non-permitted units. The closure plan would have to be followed and overseen by IHW Permits and or Remediation (attached). It appears all industrial solid waste managed tanks would have to go through closure under the plan, and following closure criteria set forth by TCEQ and EPA.

If you would like to discuss further please set up a meeting with Terry and myself.

Subject: CES Tanks

Good Monday afternoon. We pulled the NOR on the CES site and it appears that none of the tanks we discussed last week are permitted. Under regulatory status the notation is "08 RCRA Permit exempt-waste water treatment unit". If this information is correct, how does that affect the closure requirements we discussed last week?

Thanks for your help.
